

Stay confident in your care with a third-party review

A second medical opinion service through 2nd.MD

We've partnered with 2nd.MD to provide you with greater peace of mind when making health care decisions. Your health plan now offers access to a second medical opinion through 2nd.MD as a standard benefit at no additional cost.*

Whether you're looking for reassurance about an upcoming treatment or alternatives to a current care plan, 2nd.MD is available to help with a second medical opinion from a leading specialist, ready in days rather than weeks.

2nd.MD is a nationwide service offering a third-party specialist review of treatment for qualifying diagnoses and procedures. 2nd.MD providers will partner with you to review upcoming treatment plans and then coordinate scheduling a virtual consultation.

How does it work?

- 1 If you are eligible to participate, 2nd.MD. will contact you directly.
- 2 If you decide to receive a second medical opinion, 2nd.MD will first request your approval to release your medical records, then reach out to the treating doctor to obtain the necessary medical records.
- 3 A 2nd.MD specialist will be recommended, and a virtual consultation will be scheduled. Virtual consultations last 30+ minutes.
- 4 After the consultation, you will receive a written summary and post-consultation follow-up support.
