

## BILLING POLICY No. 004

### CARE MANAGEMENT SERVICES

Date of origin: July 2024

Review dates: 1/2025

## APPLIES TO

All plans

## DEFINITION

Priority Health recognizes the value of care management services that are integral to the patient-centered medical home and reimburses for them.

Priority Health reimburses, fee for service, for care management services. Care includes management of patients' medical, functional and psychosocial needs. Reimbursement is available to primary care and specialty physicians and, when indicated, to qualified health professionals (QHP). Only one practitioner can furnish and be paid for care coordination services during a calendar month.

## POLICY SPECIFIC INFORMATION

### Eligible patients

To be enrolled in care management, patients:

- Are classified as moderate or high risk based on health history
- Have one or more chronic conditions
- Have a completed care plan that meets documentation requirements
- Receive care from a trained qualified health provider (QHP) and work within a structured care team

### Reimbursement rates

Find reimbursement rates for the codes listed on this page in our standard fee schedules for your contract. [Go to the fee schedules](#) (login required).

### Billable care management codes

The CPT and HCPCS manuals define billing and coding requirements for both physician and non-physician QHP care management services.

When services are performed on the same date as care management services, the care management services should be coded with the appropriate modifier to reflect a significant, separately identifiable service was performed.

See the [Telephone and e-visits page](#) in our Provider Manual.

### Special process for care management G-code and QHP telephone visit claim payment

Priority Health has a unique process for paying G-code and telephone visit care management services for all lines of business.

1. Practices bill care management G-codes and telephone visit CPT services with their practice charges.
2. Priority Health auto-adjudicates claims, applying a \$0 payment.

On the Remittance Advice, the \$0 payment yields the full allowed dollars as provider liability.

The Remittance Advice processing code is Q11, "no compensation allowed for this service - reporting only."

The member's claim explanation displays \$0 member liability. No copayment or deductible applies.

3. Every 60 days, Priority Health batches a payment for the full allowed amount of each practice's billed G-codes and CPT codes with no member copayment or deductible.

These payments are processed with a paper check.

The check payment and Remittance Advice report are mailed to the provider's claims remittance advice address.

A Remittance Advice report designates claim detail such as member demographics, billed codes, and date of service.
