

Priority Health

Digital care at your fingertips

Access to care isn't just about geography. It's also about connecting employees to the right care for their needs.

Whole-person care means supporting the different health needs employees may have throughout their lives. That's why we've **expanded our in-network provider ecosystem to include specialized virtual providers**, giving employees more ways to access the right care and employers greater flexibility to support their workforce.

Mental health

LGBTQIA+ support: Folx Health specializes in affirming care and has the largest network of LGBTQIA+ specialized providers.

Pediatric and family mental health: Backpack Healthcare provides virtual mental health care for children ages 4+ and their families.

Substance use disorder treatment: Boulder Care provides a telehealth program that offers 24/7 access to care teams, who deliver personalized, evidence-based support.

Weight management + Digestive health

Weight management: Virta provides virtual nutrition-first, provider-led care to support weight management and type 2 diabetes remission.

Digestive health: Ayble Health is a comprehensive virtual gastrointestinal clinic providing personalized care for those in need of relief from digestive symptoms.
