

Digital care at your fingertips

We are committed to making whole-person care more accessible and convenient for everyone.

We believe that access to quality healthcare should be just as easy and convenient as getting groceries and gadgets delivered to your door. No more waiting months for appointments or compromising on care because of where you live. Our new digital solutions are designed to meet your employees where they are, providing the care they need, when they need it.

Mental Health

LGBTQIA+ support: Folx Health specializes in affirming care and has the largest network of LGBTQIA+ specialized providers.

Pediatric support: Backpack Healthcare, offering comprehensive pediatric (4+ years) and family mental health care.

Substance use disorder treatment: Boulder Care provides telehealth for substance use disorders, with 24/7 support.

Weight Management + Digestive Health

Weight management: Virta provides virtual nutrition-first, provider-led care to support weight management and type 2 diabetes remission.

Digestive health: Ayble Health is a comprehensive virtual gastrointestinal clinic providing personalized care for those suffering from digestive health issues.

Pain Management

Pain management: Flowly is a virtual clinic delivering the latest in pain science for members who have struggled to find relief.
