

TIERED vs. NARROW NETWORKS

We've built our tiered and narrow networks to offer our commercial group and individual plan members great care at a great price. They give members the opportunity to save more on out-of-pocket costs simply by receiving care through select doctors and hospitals.

Tiered networks

Members with a tiered network plan can choose from our entire provider network, with providers grouped into two tiers. The member decides which providers to get their care from, but if they choose a Tier 1 provider, they'll benefit from a lower out-of-pocket cost share.

Our standard tiered networks, available to employer groups in select regions, include:

- West MI Partners
- Southeast MI Partners

We also have several custom tiered network plans for specific employer groups.

Narrow networks

Members with a narrow network plan can choose from a limited network. Services rendered by providers not in a member's limited network aren't covered.

We offer four narrow networks to our **MyPriority**[®] individual ACA plan members:

- Corewell Health West Michigan Network
- Southeast Michigan Network
- Bronson Healthcare Partners (BHP)
- Trinity Health East Network

We also have some employer groups with custom narrow network plans.

How to support your patients

Help your patients with their tiered and narrow network plans by referring them to preferred (Tier 1) providers or those in their narrow network.

1. Open [Find a Doctor](#)
2. Search for providers, setting the member's plan (available on the front of their member ID card) as a filter to see those in their network.
