

HIV resource guide

Support for Medicaid members living with HIV

Human immunodeficiency virus (HIV) is a virus that weakens your immune system and causes acquired immune deficiency syndrome (AIDS). HIV treatment helps people live long, healthy lives and prevents the spread to your family and others. Below is a list of support options and free resources that can help.

Find a provider

Locate in-network help

You can find a specialist by using our Find a Doctor tool at priorityhealth.com/findadoc or directly through your Priority Health app or member account. In the tool, click on **Doctors by specialty** and search **HIV** to find a provider in your area.

Care Management services

Helping you be your healthiest

A care manager works with you and your providers to coordinate care, offer advice and improve your health. They can help provide you with a personalized care management plan, connect you with a community health worker and alert you to community resources. To get started, visit priorityhealth.com/caremanagement or call 888.975.8102 (TTY: 711).

Additional resources

Ryan White Organization

The Ryan White Organization helps provide care, treatment and other essential services. Visit ryanwhite.hrsa.gov/hiv-care to find services in your area.

Michigan Department of Health & Human Services (MDHHS)

The State of Michigan offers a variety of educational and community resources. Visit michigan.gov/hivsti for help with navigating HIV.

Need a ride?

Trips for medical appointments and pharmacy visits are covered. Schedule a ride by calling 888.975.8102 (TTY:711) at least three days before your visit. If you have a ride but need to be covered for the cost, you can submit a mileage reimbursement form in your member account. Visit priorityhealth.com/needaride to learn more.
