## Helping members save on prescriptions

Priority Health and Greenback Health have partnered to offer PriceMyMeds, a first-of-its-kind pharmacy program that helps commercial members save on prescriptions.

### What is PriceMyMeds?

PriceMyMeds provides pharmacy savings for members by automatically applying a discount so that the member pays a lower prescription price if one is available.

### Who is eligible?

Commercial Individual and fully-funded group members over 18 years old are eligible for the program as an added benefit to their health plan<sup>1</sup>.

### How does it work?

PriceMyMeds evaluates every prescription in real-time for discounts. Members simply need to show their Priority Health member ID card to their pharmacist. When discounts are available, members will automatically be given the discounted price at their current pharmacy.

Members can potentially save more when they download the PriceMyMeds app. The PriceMyMeds app can send members savings alerts when a better price is available at an alternative pharmacy. Members can also load their medication list and opt in for alerts when lower prices are available at nearby pharmacies.

When members fill a prescription at an in-network pharmacy the payment details are then automatically sent to Priority Health to be counted towards annual deductibles and out-of-pocket limits. Prescriptions filled at out-of-network pharmacies do not count towards annual deductible and out-of-pocket limits.

**Contact your Priority Health sales representative to learn more.**

<sup>1</sup>Participating plans must utilize the Priority Health pharmacy network to be eligible
